PROFESSIONAL SUMMARY

Results-driven Senior Network & Infrastructure Administrator with 3+ years of hands-on experience designing, deploying, and maintaining enterprise-grade network, server, and security infrastructure for organizations with 200+ users. Proven track record in firewall administration (Fortinet FortiGate, Sophos XGS), VPN architecture (SSL/IPsec), endpoint security, and compliance frameworks (SOC 2, ISO 27001). Adept at LAN/WAN design, VLAN segmentation, routing protocols, and cloud-integrated environments. Recognized for boosting system performance by 40%, reducing client downtime by 30%, and improving SLA adherence — all while building robust IT governance frameworks.

CORE TECHNICAL COMPETENCIES

Networking	Switching, Routing (RIP, EIGRP, OSPF), VLAN, VTP, STP, PVST, TCP/IP, DNS, DHCP, LAN/WAN Design
Firewall & VPN	Fortinet FortiGate 100F/80F, Sophos XGS2100, SSL VPN, IPsec VPN, FortiClient, Web Filtering
Server & AD	Windows Server 2019/2012 R2, Active Directory (500+ objects), Group Policy, TrueNAS, ESSS
Wireless & Hardware	Cisco Aironet 1850, Cisco CBS350 Switches, HPE ProLiant, Dell PowerEdge, TP-Link PoE
Cloud & SaaS	Microsoft 365, SharePoint, OneDrive, Microsoft Intune (MDM/MAM), Zoho Suite
Endpoint Security	Bitdefender GravityZone, Sophos DLP, FortiClient EMS, Patch Management
Compliance & GRC	SOC 2 Type II, ISO 27001 Auditing, SOP Authoring, Policy Governance, Incident Response
OS & Scripting	Linux (CentOS 7, Ubuntu), macOS, Windows 10/11 Enterprise, PowerShell, Automation
VoIP & ITSM	Avaya IP Office, AssetTiger, CMDB Documentation, AnyDesk, TeamViewer, RDP

PROFESSIONAL EXPERIENCE

Sr. System & Network Administrator | **SmartDocs Business Solutions** • Hyderabad, India

Jul 2025 – Present

- Serve as primary IT L2 escalation point for 200+ employee environment, consistently maintaining 99.5%+ uptime SLA across all business-critical systems.
- Architected and manage FortiClient VPN infrastructure (SSL & IPsec) enabling secure remote access for 100+ concurrent users across multiple geographically distributed sites.
- Lead LAN/WLAN infrastructure operations: Cisco CBS350 managed switches, Cisco Aironet 1850 wireless controllers, and TP-Link PoE switches — ensuring high availability connectivity.
- Configure, monitor, and optimize FortiGate 100F/80F next-generation firewalls for perimeter defense, threat inspection, and traffic segmentation using VLAN policies.
- Administer Microsoft Intune (MDM/MAM) for enterprise endpoint lifecycle — onboarding, compliance enforcement, conditional access, and remote wipe capabilities.

- ▶ Manage Active Directory (500+ objects) and ESSL biometric servers for identity, access control, and attendance management across the organization.
- ▶ Deploy and enforce Bitdefender GravityZone endpoint protection policies, proactively reducing malware incidents through real-time threat monitoring and automated response.
- ▶ Develop PowerShell automation scripts for routine administrative tasks and manage Windows patch deployment validation across the enterprise fleet.
- ▶ Drive SOC 2 Type II and ISO 27001 compliance audits — gathering evidence, remediating control gaps, and coordinating with external auditors.
- ▶ Author IT SOPs, network runbooks, security policies, and incident response playbooks to standardize operations and strengthen governance posture.

IT & Network Administrator | Hearing Solution Pvt. Ltd. • India

Jun 2024 – Jun 2025

- ▶ Delivered IT L2 support for a 150-seat call center with rapid mean-time-to-resolution across hardware, software, and network issues, improving SLA adherence by 75%.
- ▶ Configured Sophos SSL VPN and OpenVPN tunnels providing secure remote connectivity for a distributed workforce, reducing access-related incidents significantly.
- ▶ Led enterprise-wide Windows 11 deployment — managing imaging, driver compatibility, and user migration with zero data loss across 150+ endpoints.
- ▶ Maintained Sophos XGS2100 next-generation firewall: threat policies, web filtering, and granular traffic inspection to protect business and customer data.
- ▶ Implemented Sophos Data Loss Prevention (DLP) policies to safeguard sensitive customer and business information from unauthorized exfiltration.
- ▶ Configured and maintained ESSL, TrueNAS, and WD My Cloud EX4100 NAS for centralized data storage, backup, and disaster recovery readiness.

Network Engineer | YuppTV India Pvt. Ltd. • Hyderabad, India

May 2023 – Jun 2024

- ▶ Provided IT L2 support for 100+ users, managing end-to-end lifecycle of desktops, laptops, servers, and network equipment.
- ▶ Configured Fortinet VPN tunnels (SSL/IPsec) and maintained on-premise Avaya IP Office VoIP infrastructure for business communications.
- ▶ Implemented DLP policies and created comprehensive network topology documentation supporting disaster recovery planning.
- ▶ Managed Windows 10 Enterprise deployments using standardized imaging and post-deployment validation, minimizing rollout incidents.
- ▶ Resolved complex macOS issues (installation through performance tuning) and provided Office 365 troubleshooting across the organization.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- ▶ **Cisco Certified Network Associate (CCNA)** ✓ Completed
- ▶ **Linux Administrator Certified** ✓ Completed
- ▶ **Fortinet NSE 4 – Network Security Professional** ● In Progress
- ▶ **CompTIA Security+** ○ Planned
